CAMILLE FISHEL
Bending Over Backwards

A HUG FROM THE ART WORLD

Camille Fishel is an emerging artist whose work combines bold, pop-inspired color with fluid, metaphorical movement. Drawing from her background in fashion and studies in architecture, she builds her paintings like sets—vibrant, dramatic, and slightly surreal. Her work explores femininity, identity, and the pressures placed on women.

In her 2026 series, *Bending Over Backwards*, Fishel looks at all the ways women are expected to bend, twist, shrink, and reshape themselves to fit what the world asks of them. Through exaggerated and impossible poses, the women quite literally bend over backwards—turning familiar pressures into something physical, playful, and at times absurd.

Fishel has exhibited her work both locally and internationally, including with Art D'Égypte in Cairo, Egypt. While oil on canvas remains her primary medium, her practice has expanded beyond painting into furniture and carpets, bringing the same bold visual language into three-dimensional form.
